GSEA: GO biological process (top 20)
Flunarizine vs DMSO, IR background
Sterol metabolic process
Sterol biosynthetic process
Secondary alcohol metabolic process
Alcohol biosynthetic process
Steroid metabolic process
Organic hydroxy compound biosynthetic process
Steroid biosynthetic process
Triglyceride biosynthetic process
Alcohol metabolic process
Isoprenoid metabolic process
Neutral lipid biosynthetic process
Transforming growth factor beta production
Positive regulation of substrate adhesion dependent cell spreading
Nuclear chromosome segregation
Regulation of chromosome organization
Regulation of nuclear division
Mitotic nuclear division
Sister chromatid segregation
Mitotic sister chromatid segregation
Regulation of mitotic nuclear division
