GSEA: Hallmark pathways
Flunarizine vs DMSO, IR background
Cholesterol homeostasis
MTORC1 signaling
Bile acid metabolism
Androgen response
Heme metabolism
P53 pathway
Fatty acid metabolism
Xenobiotic metabolism
Peroxisome
Myogenesis
Adipogenesis
Hypoxia
IL2 STAT5 signaling
Glycolysis
TNFA signaling via NFKB
Unfolded protein response
Apoptosis
DNA repair
Coagulation
Angiogenesis
Mitotic spindle
TGF beta signaling
Apical junction
MYC targets v2
Epithelial mesenchymal transition
MYC targets v1
E2F targets
G2M checkpoint
